Professional summary:

As a Front-end Developer with 11 months of professional experience, I possess the ability to think strategically and propose innovative solutions for developing interface design and user experience (UX). My expertise includes creating clean, responsive designs that ensure optimal performance and fast loading speeds. I am dedicated to fine-tuning every aspect of the web experience, working independently and proactively to master both existing and emerging technologies and frameworks. My constant pursuit of new methods to enhance my projects and contribute effectively to the company drives my passion for front-end development.
